

Unsure of your major? Think you want to pursue an AA degree?

We have Exploratory AA tracks that you can select until you finalize your academic goals. If you choose one of these tracks you will have the opportunity to work with your academic advisor and the Career Resource Center to learn more about academic options related to your Exploratory track. If you choose an Exploratory AA, you will be able to stay in an Exploratory track until you have completed 24 credit hours toward the AA degree, at which time you will be required to select a more specific academic track.

AA-1014 Exploring Health & Technical Programs – pick this track if you are considering a career in the health care field or a technical program but are still exploring the specific field or degree you are interested in. It's also a good option if you are considering a Santa Fe limited access program, but need to take some AA courses in order to be eligible to apply to or start in the program. This can incorporate an interest in: Clinical Lab Sciences/Medical Technology, Communication Sciences and Disorders, Exercise and Sports Sciences, Health Sciences, Nursing, Nutritional Sciences, Pharmacy, Zoo Animal Tech, Respiratory Care, Health Services Administration and other related majors.

AA-1015 Exploring Social Science – choose this track if you think you might be interested in anything related to the social and behavioral sciences or business, but want some time to explore your options. This can include an interest in: Anthropology, Criminology and Law, Economics, Education, Geography, History, International Studies, Political Science, Psychology, Sociology, Social Work, Accounting, Business Administration, Hospitality Management, Sports Management and other related majors.

AA-1016 Exploring Arts & Humanities – this track is for when you are trying to narrow down your interest in a major related to the arts, humanities, or languages. This can include: African American Studies, Chinese, Classical Studies, English, French, German, Japanese, Jewish Studies, Linguistics, Philosophy, Portuguese, Religion, Russian, Spanish, Art, Art History, Theatre, Dance, Architecture, Landscape Architecture, Building Construction and other related majors

AA-1017 Exploring Science – select this track if you think you might be interested in the STEM (science, technology, engineering, math) fields and want some time to explore your options before making a final decision. This includes an interest in: Astronomy, Biology, Botany, Chemistry, Environmental Science, Forestry, Geography, Geology, Marine Sciences, Microbiology and Cell Science, Physics, Zoology, computer Science, Mathematics, Statistics, Engineering and other related majors
