Health Care Workers Discuss Best Way to Share Information in New Era

From the August 15, 2013 *Gainesville Sun*:

"A critical component of health care reform — health information management — took center stage on Thursday morning at a health care summit at Santa Fe College.

As hospitals throughout the nation transition from one disease classification to another, codes for those conditions will multiply, putting the onus on health care professionals to correctly enter in data, interpret and share it.

Julie Shay, the program director healthcare information technology (HIT) management programs at Santa Fe, said...."
